

## City of Killeen Compliance Plan

### For City of Killeen Vehicle Wash Facility Certification Program Equipment Evaluation

This form is for properties that are unable to successfully complete the Vehicle Wash Equipment Evaluation by the required due date, wish to postpone equipment repairs for future budget cycles, or wish not to operate sections of the vehicle wash system. A Compliance Plan serves as an alternate method of complying with City of Killeen (COK) Vehicle Wash Facility Certification Program. This Compliance Plan can serve to notify COK of a wash facility property's intent to turn off their non-compliant vehicle wash system, turn off certain portions of the non-compliant vehicle wash equipment, and / or specify a timeline for system upgrades. **The actions detailed in this Compliance Form shall stay in effect until updated by a new Compliance Form or until a successful Vehicle Wash Facility Equipment Evaluation of the entire vehicle wash system has been submitted to City of Killeen.**

Operation of any vehicle wash equipment station requires submittal of a Vehicle Wash Facility Equipment Evaluation Form completed by a State-licensed plumbing inspector or a State-licensed plumber.

In order to place vehicle wash equipment back in operation, a new Vehicle Wash Facility Equipment Evaluation Form must first be submitted to COK completed by a State-licensed plumbing inspector or a State-licensed plumber certifying that the vehicle wash equipment is in compliance with City of Killeen Vehicle Wash Facility Certification Program.

Attached to this form should be:

- A map of the property (see instructions below)
- Vehicle Wash Facility Equipment Evaluation Form completed by a State-licensed plumbing inspector or a State-licensed plumber.
